

EDWARD KYE

Software Engineer

WORK EXPERIENCE

PUBNATIVE | Software Engineer

New York, NY | February 2020 - March 2020

Mobile publisher platform and programmatic ad exchange

- Assisted in migrating Verve to PubNative (Media & Games Invest).
- Implemented a new CDN to deploy ads and purge cached content using third-party documentation and API.
- Used Jira's API to get ticket information when building ads and to add the demo URLs to the ticket when deploying.
- Maintained and continued to create custom mobile ads using JavaScript/HTML/CSS.
- Trained new members of the front-end team.

VERVE | Software Engineer

New York, NY | January 2019 - January 2020

Location-powered mobile marketing platform

- Built, tested, and deployed hundreds of custom mobile ads - banner, expandable, animations, videos, games, and more.
- Templatized custom ads to optimize build time.
- Helped build and redesign the UI/UX of an order management system using JavaScript/CSS/React/Redux.
- Collaborated with mobile and platform engineers to build a new SDK.
- Migrated custom ads to a new ad server using internal API.
- Shifted all custom ads to deploy to a new ad server.
- Hired, trained, and led two engineers.

SOFTWARE APPLICATIONS

RALLY | Software Engineer

New York, NY | 2018

Tennis matchmaking with an elo ranking system

- Spearheaded all views of the application to maximize user experience using JavaScript, React, and CSS.
- Optimized Apollo and GraphQL to handle multiple queries and mutations for speed and scalability.
- Constructed the schema and tables on the back-end using GraphQL/PostgreSQL.
- Assembled Firebase Google OAuth for user authentication.

ABOUT ME

Hi! I'm Ed. I'm interested in front-end technologies, omakase sushi, pasta, and strategy games. I'm always willing to try and learn new things.

SPECIALIZATIONS
